

EFAFLEX 
safe high-speed doors

EFA-SmartConnect®

Intelligent networking for your doors

EFA-SmartConnect®:

Manage all your doors in one app

Benefits

- Provides the status of all doors to your smartphone
- Simplifies planning of maintenance and repairs
- Fast problem diagnosis and digital service notification sent to EFAFLEX
- Prevents downtime and unnecessary costs
- Easy to retrofit (EFA-TRONIC® required)
- Basic parameters can be set using the app

Data security

- Use of the existing Wi-Fi possible
- Data ownership remains with the user
- No registration necessary
- Works independently of mobile networks
- Modern security standards (e.g. WPA2, PSK, AES, etc.)
- Additional proprietary encryption of TCP and UDP packages

Efficient technology, ready for Industry 4.0

All your doors at a simple glance

With EFA-SmartConnect® EFAFLEX are providing the IoT solution for your network enabled doors. This simple user-friendly app provides intuitive prompts to real time centralized monitoring, providing the status of your doors. In line with the principle of 'Diagnosis – Service – Maintenance' should any fault occur it's immediately be flagged for preventative action, minimizing downtime, lowering associated operating costs.

Optimised service – only a click away

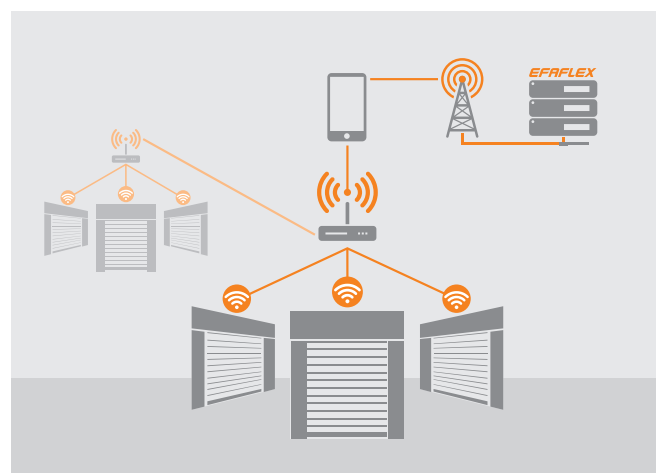

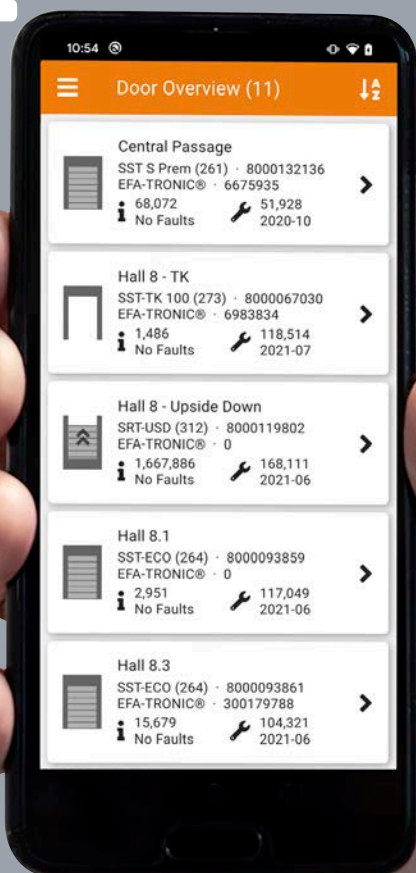

Thanks to the in-built technology this clever app works efficiently in the background. In the event of failure, messaging can be forwarded directly to your local EFAFLEX service partner using real time information that accelerates the process, reducing downtime yet further. Assistance really is just a click away.

Maximum data security

Thanks to the technology your data security is assured. EFA-SmartConnect® only gathers the data it needs, saving it locally in your network. Throughout the process information remains safe and confidential using state of the art end-to-end encryption. Quite simply, you decide which data you send to your EFAFLEX service partner, with all transmission prompts requiring confirmation.

Innovation in a small space

The EFA-SmartConnect® module can be installed with the introduction of the app in the door control of almost all doors. It continuously sends status reports to the app and thus allows the direct transmission of incidents or the service requests you have released to EFAFLEX.
